MainStreet

# set your website free with Altus MainStreet

## How can MainStreet Help?

Unlike many tools for managing your website, MainStreet gives you the freedom to add and delete pages, to rearrange your website, to create whole new sections, as well as providing unmatched ability to incorporate specialized content.

## How Does It Work?

MainStreet provides simple content management tools that allow you to build web pages to describe your organization, while MainStreet manages your links, and the layout of your website. All you do is create the content for your pages, and sort them using MainStreet's administrative software.

## What Can I Do?

In addition to tools for designing web pages, MainStreet modules can be configured to provide a number of specialized functions, including:

- News Releases and RSS feeds
- Event Calendars
- Directories
- Portfolios
- Content indexing under multiple categories
- Reservations

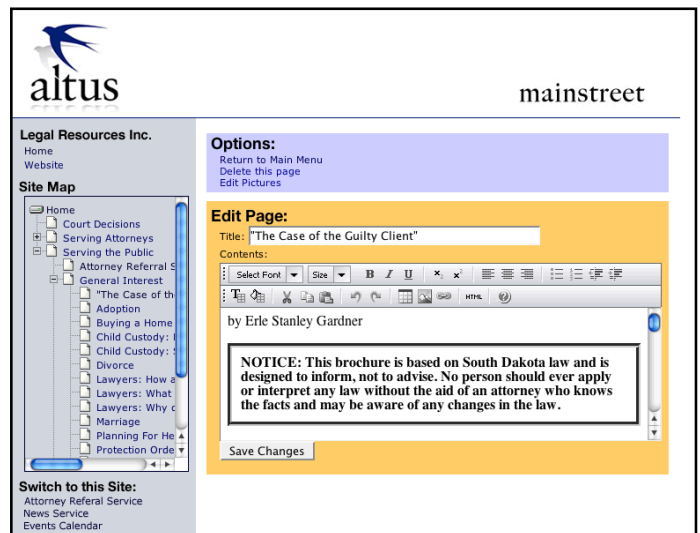

You can integrate any or all of these modules in a single website. Multiple MainStreet modules can be accessed through a single navigation panel on your website, allowing you to build a feature-rich website that is not intimidating. MainStreet makes complex websites user friendly.

## I Want to Know More!

We're happy to give you a tour of what MainStreet can do for you. Contact Richard Jensen at 605-376-6743 to set up a demonstration of MainStreet's ground-breaking flexibility and carefully crafted management tools.

**What's Up Front:** MainStreet websites are attractive and easy to use. Your visitors will have no difficulty finding the content they need quickly and easily. Website design and layout is independent of your content. You don't have to worry about keeping links up to date, or placing new content into pages you've already built. MainStreet takes care of all that.

**Behind the Scenes:** Not only are MainStreet sites easy for your visitors to use, they're easy for you to use too. When you log in to your control panel, you'll find clearly labeled tools that let you edit pages, add photos, and even add new pages and new sections to your website. MainStreet keeps your website up to date when you need to add, update, or rearrange things.
